

Abstract of the Invention

A thin profile wipe dispensing container is provided for dispensing wipes from a stack of wipes. The dispensing container has a contoured shape to minimize shelf space and integrate with any space and includes an angled container body and hinged lid that snaps shut. The lid is flush with the container body when closed providing the thin profile wipe dispensing container that may easily and economically be used, stored and transported.

The container body may further include a removable bridge in an open mouth of the container body with a dispensing aperture through which the wipe may be drawn. The container body may also include a spring device for maintaining the position of the wipes within the dispensing container to help dispense one wipe at a time.
